PROJECTS

SOFTWARE

- **Hyprland Custom Rice**

Customized Hyprland Linux desktop environment with personalized configuration, theming, and workflow optimizations.

- **Attraker – Attendance Tracking App**

Android application made with kotlin for tracking and managing attendance, with a simple interface.

- **Scoutly**

A platform designed for exploring and documenting lesser-known locations, enabling communities to share trails, images, and information to help others discover and navigate unique places.

HARDWARE

- **Pi Security Camera**

Raspberry Pi-based security camera system with motion detection and remote video monitoring automated using bash scripting

- **Pi Home Server**

Self-hosted home server using Raspberry Pi for file storage, network services, and remote access.

ACTIVITIES AND LEADERSHIP

- **1st Place – Robo Soccer Competition**

Designed and built a custom robot with my team and competed in an autonomous/manual robo-soccer event, securing 1st place.

- **2nd Place – Robo Race Competition**

Built and optimized a racing robot with my team for and obstacle course, finishing 2nd in a competitive the event.

- **4th Place – Line Follower Competition**

Developed and tuned a line-following robot using IR sensors and control logic in arduino nano, placing 4th.

- **Participant – Smart India Hackathon (SIH)**

Participated in a national-level hackathon working with a team to develop an AI integrated attendance and behaviour tracking camera.

- **Participant – HackNation, Silicon Institute of Technology (Bhubaneswar)**

Competed in a time-bound hackathon building innovative technical solutions with a team.

EDUCATION

- **B.Tech, Computer Science and Engineering, (1st year)**

Sambalpur University Institute of Information Technology (SUIIT)

SKILLS

Programming: Python, JS-HTML-CSS, C, C++(arduino), Bash scripting, Lua

Platforms: Linux (mostly debain, ubuntu and arch based distros), Windows

Languages: English, Hindi, Odia

Other Interests: Astrophotograpy, Video Editing, Chess, Guitar, Running
